CIRCULAR

Sub: Guidelines for Control of Chikungunia ‘Do’s and Don’ts.’

The rainy season is very prone to diseases like Dengue and Chikungunia which spread during and after the rainy season every year. This is also a mosquito generated disease and sometimes it gains the form of an epidemic if remedial measures are not taken. The prevention is the best method to control the Chikungunia disease. In order to control and prevent the Chikungunia outbreak, it is essential to avoid mosquito breeding in the school areas. The Do’s and Don’ts on the above subject are hereby reiterated for the reference of HOSs/Teachers/Students. All Heads of Government/Government Aided/Recognized Unaided Schools are directed to display the following ‘Do’s and Don’ts at prominent places in the school premises, to bring the same to the notice of students/teachers/visitors. Further, during assembly, all students and teachers may please be sensitized about dengue outbreak and control measures for mosquitoes breeding in and around their houses.

Do’s

- Keep all the water containers/overhead tanks etc. properly covered.
- Dry all the desert coolers and containers in houses, offices, factories, schools etc. once a week.
- Add two table-spoons of Petrol/kerosene oil in desert coolers, containers, uncovered/improperly covered tanks etc. If they can’t be dried weekly.
- Use mosquito repellants on exposed parts during daytime to prevent mosquito bites.
- Wear full sleeved clothes and long dresses/trousers that cover arms and legs, especially during epidemic season to prevent mosquito bite. However, all the students should be allowed to wear any Full Sleeves clothes to cover their body to save themselves from mosquito bites, in case they do not have uniform which covers their bodies completely till the end of September as per medical advice.
- Use mesh doors/windows, mosquito coils, vapour mats etc. to keep mosquitoes away.
- Use bed nets even during day time especially for infants and small children.
- Protect dengue patients from mosquito bites by any of above methods.
- Weekly anti-larval measures in around construction sites where there are water collections.
- Ensure that there is no water logging on the roof top, in the ground areas around the schools and there is no broken furniture in open space.

Contd. .........2...
Don’ts

- Don’t let water to collect in and around houses, offices, schools, factories etc.
- Don’t let broken earthenware, bottles, pots, flower vase, tyres, toys etc. to collect out side or on roof tops.
- Don’t leave water in desert cooler when not in use.
- Don’t store water uncovered or in not properly covered containers/tanks.
- Don’t store tyres outside in workshops, godowns etc.
- Don’t give aspirin/brufen to patients with dengue fever.

All the Heads of Schools under Directorate of Education have to give a certificate of compliance to Zonal DDE’s.

This issues with the prior approval of Competent Authority.
