BaLA (Building as Learning Aid) has been implemented in several thousand primary and elementary schools across India. This manual for school principals and teachers will enable them to effectively use various BaLA elements in their school environment - indoors and outdoors. The manual contains nearly 200 activities under 43 categories of BaLA ideas covering various subjects ranging from language, mathematics, science to life skills for classes I to VIII. This well illustrated manual contains over 1000 coloured graphics and photographs from across the country to communicate activities, their variations, innovations of ideas and their usage. This manual has been prepared by experienced teachers, teacher trainers and pedagogues who have conducted several workshops across the country with school teachers on using BaLA. The manual has been developed by Vinyās - the inventors of BaLA.
